Yes. I agree with you assessment on the time availability, as well as the unknowns with AD. See my revised Table. What do you think?

Hi Russ,

See attached for the tight squeeze version so that we can make the PRIA date. (In order to do this, I resulted to only giving RAB 45 days post contractor, not 60, based on Shannon's email of only needing 1-2 months.)

I am going to put this forward with the sentiment that this would be super tight, especially given the time of year. And that it depends heavily on workloads of a tox person (prob Angela G.) and the new Eco guy. Is that accurate?

Hi Russ and Gina- are you working tomorrow? Can you sort it out then so Russ can give an estimate? Looks like Bob wants this info by tomorrow.

Gina- can you send or re-send Russ the bean sheets for the work that BPPD will do? I see recent ones for AD but none revised for what RAB is expected to do. My ability to search on my phone is a bit limited.

Russ- once you get those, please provide Gina with a timeline of the expected completion dates for each milestone. You can check with Cathy or Pam about the status of the contract work - this may not be going to the contractor until June 1.

Thanks!

Didn't Gina redo the BEAN sheets? I think that should make it clear but if not maybe check with her.

Once you are sure, can you provide a timeline?

Thanks,
Shannon

I am assuming I am doing it, but was never given any real marching orders, and was unsure of the timing of everything. This thing has always appeared to be rather seat of the pants in terms of timing and coordination.

Hi Russ,

Didn't we already decide who was doing what- aren't you doing product chem only? I think you only need to respond based on the work you need to do. Haven't we sent our studies to the contractor? They can definitely do them. Maybe Gina can find out if AD needs our product chem review before they can do their work.

Shannon/Gina:

It appears to be a pretty compressed timeline. There was only one date on the spreadsheet that stated that AD would have the Risk Assessment back to BPPD by August 30. Everything else is blank.

Hi Russ,

BPB is going to negotiate a new PRIA date for Formica acid. Can you address Gina's questions below on the proposed Aug 30 date for the risk assessments and when the specified milestones will be met?

Thanks,
Shannon

Shannon and Laura,

As a follow-up to my earlier email,
attached is the specific information that
I am being asked to provide to
management to support the extension
to Nov for the due date and Aug 30 for
the RA data.

Please give me your best estimates on
timing.

Thanks!
Gina

Subject: Formic acid

Hi Shannon and Laura,

For the Formic Acid package (two MPs and tow EPS), we discussed needing more than the 7 months allotted for this non-food new use PRIA action. We had decided that a risk assessment due date of August 30, 2019, was reasonable, and this would mean a renegotiated PRIA due date of late November.

I have put forward forms, in agreement with the company, to change our PRIA due date officially to November 26, 2019. However, I need your help. Management is asking specifically how much time will be allotted (between now and August 30th) for primary review in each division, secondary review (wherever that might be) and final risk assessment writing (again, where/who).

Can you please describe for me your plan to meet the August 30th science due date?

Many Thanks!

Gina
